EDUCATION

CUNY Queens College
Bachelor of Science in Computer Science

Queens, NY
Expected May 2027

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C++, SQL, HTML/CSS, Bash

Frameworks & Libraries: React, Next.js (App Router), Vite, Node.js, Express.js, NestJS, Flask, Tailwind CSS, [Chart.js](#), OpenCV, DeepFace

AI & Cloud: GPT-4 API integration, AI coding agents (Claude Code, OpenAI Codex), agent memory capture and recall, agent tracing with OpenTelemetry, Google Speech-to-Text, computer vision (OpenCV, DeepFace), AWS (Amplify, Cognito, S3, CloudFront), Cloudflare Pages and Workers

Tools & Practices: Git/GitHub, Code Review, Jira, GitHub Actions (CI), Sentry, PostHog, Unit & End-to-End Testing, Cross-Device Accessibility (WCAG) QA, Internationalization (en/es/el), Excel VBA

EXPERIENCE

Puberry
Software Engineering Intern

New York, NY
June 2026 - August 2026

- Led the mobile-responsive redesign of 3 user portals (student, teacher, and parent), an 8-step registration and authentication flow, and the daily check-in interface; validated across **3 iOS device breakpoints** and deployed to production.
- Developed the front end for Duels, a turn-based trivia feature localized in English, Spanish, and Greek, deployed to production on a platform serving **1 million students**.
- Implemented shared client-side input validation, resolved localization defects rendering raw translation keys in production, and engineered focus-based polling for live roster updates.

Augenta AI
Forward Deployed Engineer

New York, NY
March 2026 - June 2026

- Implemented an agnostic adapter for multiple agent harnesses (Claude, Codex, Cursor) to collect telemetry data to our platform.
- Refactored the shared ingestion path and built an automated test suite in CI, ensuring both agent integrations captured and recalled developer context identically; delivered the customer-facing dashboard in React and TypeScript, deployed to Cloudflare Pages.
- Scaled the platform from single-user to **multi-tenant organizations**, developing a REST API endpoint that returns full organization membership and the React dashboard views for member visibility and management.

Office of Student Financial Assistance, CUNY
Financial Aid Technical Assistant

New York, NY
May 2021 - Present

- Automated financial aid processing workflows using Excel VBA macros, supporting **15,000+** students annually and reducing manual processing time across **5 core processes by 40%** while maintaining **99.9%** data accuracy across **10,000+** institutional records.
- Conducted QA and accessibility testing across student portal systems, identifying and documenting **50+ defects** and WCAG compliance violations for remediation.

PROJECTS

Polly Debate AI | Python, React, Flask, OpenCV, Google APIs

October 2025

- Collaborated on a full-stack debate coaching platform analyzing live speech and facial expression, improving user debate performance metrics by **56%**.
- Owned the React and WebRTC front end for real-time video capture and the Flask back end streaming frames through OpenCV and DeepFace at **30+ FPS** with Google Speech-to-Text.

UP! Investments | React, Node.js, Tailwind CSS, Cloudflare Workers

October 2025

- Built a real-estate investment analysis platform comparing ROI across **3 strategies**: flip, long-term rental, and short-term rental using live Zillow property data and market trends.
- Architected a serverless back end on Cloudflare Workers, reducing infrastructure costs by 80% while maintaining **sub-200 ms** API response times.

LEADERSHIP

Queens College Computer Science Club
Treasurer / Event Coordinator

Queens, NY
February 2024 - September 2025

- Handled the **\$8,000+** HackHarvard 2024 trip budget, booking travel, lodging, and registration for **40+** students.
- Oversaw a **\$15,000+** annual club budget, coordinating **10+** technical events including hackathons, workshops, and speaker sessions with **200+** total attendees.
- Organized and led an HTML/CSS workshop for **30+** students, introducing front-end development fundamentals and best practices.
